

QUARTERLY REPORT

Report for quarter of the year

BATTERIES AND ACCUMULATORS			Production (kg)		Import (cross-border transport) (kg)		Export (cross-border transport) (kg)		Placed on the market in SR (kg)	
Type of battery and accumulator	Chemical composition	Abbreviation	Non-rechargeable	Rechargeable	Type of battery and accumulator	Chemical composition	Abbreviation	Non-rechargeable	Rechargeable	Type of battery and accumulator
Portable batteries - up to 5 kg	Zinc-Carbon / Zinc-Chloride	ZnC / ZnCl								
	Alkaline-manganese / Nickel-zinc	AlMn / NiZn								
	Lithium	Li								
	Lithium-thionylchloride	Li-SoCl ₂								
	Lithium-ion / Lithium-polymer	Li-Ion / Li-Pol								
	Nickel-metal-hydride	NiMH								
	Silvered-oxide	AgO								
	Zinc-air	ZnAir								
	Lead	Pb								
	Nickel-cadmium	NiCd								
	Others	-								
TOTAL:										

BATTERIES AND ACCUMULATORS			Production (kg)		Import (cross-border transport) (kg)		Export (cross-border transport) (kg)		Placed on the market in SR (kg)	
Type of battery and accumulator	Chemical composition	Abbreviation	Non-rechargeable	Rechargeable	Non-rechargeable	Rechargeable	Non-rechargeable	Rechargeable	Non-rechargeable	Rechargeable
Industrial batteries - above 5 kg	Lithium	Li								
	Lithium-iron-phosphate	LiFePO4								
	Lithium-ion / Lithium-polymer	Li-Ion / Li-Pol								
	Nickel-metal-hydride	NiMH								
	Nickel-cadmium	NiCd								
	Lead	Pb								
	Others	-								
TOTAL:										
Battery for light vehicles (LMT) - up to 25 kg	Lithium	Li								
	Lithium-ion	Li-Ion								
	Lead	Pb								
	Others	-								
TOTAL:										
Battery for electric vehicles (EV) - over 25 kg	Lithium-ion	Li-Ion								
	Others	-								
TOTAL:										

PATTERN

Explanation:

"portable battery" means a battery that is hermetically sealed, weighs 5 kg or less, is not specifically intended for industrial use and is not an electric vehicle battery, LMT battery or SLI battery;

"industrial battery" means a battery that is specially designed for industrial use, intended for industrial use after being the subject of preparation for a change of purpose or after a change of purpose, or any other battery weighing more than 5 kg, and which is neither a battery for an electric vehicle, an LMT battery, or an SLI battery;

"light vehicle battery" or "LMT battery" is a battery that is hermetically sealed, weighs 25 kg or less, and is specifically designed to provide traction for wheeled vehicles that can be powered only by an electric motor or a combination of motor and human power, including type-approved vehicles of category L in accordance with Regulation of the European Parliament and the Council (EU) no. 168/2013 (43), and which is not a battery for an electric vehicle;

"battery for an electric vehicle" means a battery that is specifically designed to provide electrical energy for the propulsion of hybrid or electric vehicles of category L, as defined in Regulation (EU) No. 168/2013, and which has a weight of more than 25 kg, or a battery which is specifically intended to provide electricity to drive hybrid or electric vehicles of categories M, N or O, as set out in Regulation (EU) 2018/858;
